GRADUATING CLASS—1883.

Names.	Theses.
George Edwin Allen,	Cataract.
Frederick Augustus Bragdon,	The Circulation of the Blood.
William Hallett Cole,	Opium.
Oliver Fernald Cushing,	Rachitis.
Oscar Sanborn Charles Davies, A.M. (Bowdoin.)	Gonorrhoea.
Mark Trafton Dodge,	Treatment of Diphtheria.
Walter Joseph Downs,	Health and Disease.
Frederick Arthur Chase Emerson,	The Mind in Disease.
Crosby Gordon Eaton,	Scrofula.
John Lewis Fortier,	Use of the Obstetrical Forceps.
Alva Haven Harriman,	Anæsthesia.
Alfred Hitchcock, A.B., (Bowdoin.)	Female Perineum.
Alvin Dennett Holmes, A.B., (Bowdoin.)	Opium, its Uses and Abuses.

Thomas Fillebrown,	Chemical Analysis.
Edward Johnson,	Peritonitis.
Frederick Wm. Kelley,	Typhoid Fever.
John Henry Keating, A.B., (Kings College.)	Diphtheria.
George Woodworth Lougee,	Typhoid Fever.
Willis Bryant Moulton,	Those Diseases of the Eye and Ear which should be treated by the general practitioner.
Everett Thornton Nealey,	The Microscope in Medicine.
Clarence Ardeen Peaslee,	Our Doctors.
Clark Barker Rankin, A.B.,(Bates.)	Acute Dysentery.
Charles Martin Sleeper,	Physical Culture.
Jacob Houlton Syphers,	Acute General Peritonitis.
Thompson Joseph Trueman,	Irritation and Sympathy.
Herbert Francis Twitchell,	Sphincters Ani.
Peleg Benson Wing.	Typhoid Fever.
Francis Pierce Whitaker,	Diphtheria.

ANNOUNCEMENT.

The Medical School of Maine, by an Act of the Legislature, is placed under the superintendence and direction of the Board of Trustees and Overseers of Bowdoin College. By their joint authority all the degrees of M. D. are conferred.

The 64th Course of Lectures will commence February 7th, 1884, and continue sixteen weeks. The introductory lecture will be delivered at 3 o'clock P. M., by Prof. Charles W. Goddard

MEANS OF INSTRUCTION.

The specimens of Normal, Morbid and Comparative Anatomy are annually increased in number. The Museum has lately been thoroughly rearranged and enriched by purchases abroad.

The Chemical Department embraces every article of apparatus essential to a complete illustration of the principles of Chemistry.

A new laboratory has recently been furnished for special courses in analytical chemistry, urinary analysis and toxocology. These courses are strongly recommended to every student.

The lectures in Physiology are illustrated by Auzoux models and by experiments.

Instruction in Normal and Pathological Histology is afforded without extra charge,

Students are advised to prepare for their Anatomical and Physiological studies by the dissection of the cat, dog, rabbit and frog, using Wilder & Gage's Anatomical Technology, Foster & Langley's Practical Physiology, or Huxley & Martin's Biology.

CLINICS.

Clinics are held every SATURDAY MORNING during the second half of the term. Patients requiring medical or surgical advice and treatment may present themselves on Saturday mornings from 8 to 11 o'clock.

All examinations in the presence of the Class are made without charge. All surgical operations are gratuitously performed.

TERMS OF ADMISSION.

Candidates for Matriculation will be required to give evidence that they possess a good English education. Those who are graduates of Colleges, Normal Schools, High Schools, or have passed the entrance examination to any recognized College, on presentation of their diplomas or matriculation tickets, will be exempt from examination. Examinations will be held on THURSDAY, FEBRUARY 7th, at 9 o'clock, A. M.

The Fee for admission to the several Courses of Lectures, *payable strictly in advance, and by cash only*, is $78. Matriculation Fee, payable each term, $5.

Pupils who have attended two full courses of Medical Lectures, one of which has been in this School, are admitted to all subsequent courses without payment of any Lecture Fees.

Students who have attended two full courses at other regular Medical Institutions, are required to pay $25 for admission to their first course of Lectures at this School, in addition to the Matriculation Fee.

The Graduation Fee, (which is not returnable), including the Diploma, is $25. Fee for Analytical Chemistry, $10.

No student will be allowed to attend any Course of Lectures in this School, without the certificate of the Secretary. Members of the Medical Profession are cordially invited to attend the Lectures at any time.

Graduates of other Schools, who have been engaged three years in the regular practice of medicine, may receive a general ticket upon presentation of their diplomas and payment of the Matriculation Fee. Students are expected to remain till the close of the term.

EXAMINATIONS AND GRADUATION.

Students, and particularly candidates for a Degree, are examined either daily or weekly on the subjects of the Lectures. Especial attention is directed to the fact that members of the Faculty, in each department, hold gratuitous examinations on specified days of each week, upon the subjects of the Lectures.

The Faculty, believing it to be desirable for students to pay especial attention to the primary branches during the first portion of their course of study, in order that they may be better prepared to appreciate the more advanced subjects in the latter part, voted seven years ago, that any student might present himself for examination in Anatomy, Physiology and Chemistry (any or all), at the regularly appointed time for examination, provided he previously presented to the Secretary satisfactory evidence that, at the close of the current term, he had completed at least twelve months of actual study, and had attended a full course of lectures in this School. Those who are examined in Anatomy are required to present evidence that they have under competent instructors dissected not less than two parts. The same requirements will be enforced in the cases of those who are examined in this department at graduation. Three years ago they voted additionally that any student may present himself for final examination in Materia Medica and Therapeutics, and in Obstetrics, at the regularly appointed time for examination, providing he previously presents to the Secretary satisfactory evidence that, at the close of the current term, he shall have completed at least two years of actual study and have attended two courses of Lectures, the second of which must have been in this School. An official record of the result of the successful examinations shall be kept by the Secretary. The successful passage of an examination will not exempt a student from faithful attendance upon any exercises in any department during subsequent courses.

The examinations for the Degree of Doctor of Medicine are held by the Faculty of Medicine at the close of the course of Lectures. Degrees are conferred at Commencement.

The candidates must be twenty-one years of age, and must have devoted three years to their professional studies under the direction of a regular Practitioner of Medicine. They must have attended two full courses of Lectures in some regular, incorporated Medical Institution; and the last course previous to examination must have been at this School. They must deposit with the Secretary of the Faculty satisfactory certificates of good moral character, and of having pursued their medical studies for the required term. They must also pass a satisfactory written and oral examination in Anatomy, Physiology, Surgery, Chemistry, Materia Medica, Pharmacy, Obstetrics, Pathology and Practice. They must also present a Thesis or Dissertation on some medical subject, a fair copy of which must be deposited with the Secretary of the Faculty at least ten days before the commencement of the examination at the close of the Lectures. These copies are preserved in the Medical Library.

Students on arriving should call at once on the Secretary of the Faculty, A. Mitchell, to enter their names, present their certificates, and purchase their tickets. They may also obtain from him all necessary information in regard to boarding houses.

Price of Board from $3.00 to $5.00. per week.

By order of the Faculty,

ALFRED MITCHELL, M. D., Secretary.

Brunswick, July, 1883.

TEXT BOOKS.

Anatomy—*Text Books*, Quain, or Gray; *for the dissecting room*, Ellis's Demonstrations, or Heath's Practical Anatomy; *for reference*, Braune's Topographical Anatomy, Flower on the Nerves, Frye's, or Satterthwait's Histology.

Chemistry—Beilstein's Elements of Qualitative Analysis, Roscoe's Chemistry, Watt's Dictionary of Chemistry, Janot's Physics.

Physiology—Ashby, Dalton, Flint, Foster, Martin.

Materia Medica and Therapeutics—Bartholow, H. C. Wood, Biddle, Stille, Ringer, Headland, Gerrish on Prescription Writing.

Practice of Medicine—Flint, Bartholow, Roberts, Bristowe, Niemeyer.

Pathology—Green, Reindfleisch, Wagner, Virchow.

Physical Diagnosis—Clapp's Tabular Handbook, Flint, Da Costa, Loomis.

Diseases of Children—J. L. Smith, Vogel, West.

Surgery—Agnew, Gross, Erichsen, Druit, Clark, Greene's Questions, Gerrish's Translation of Championniere's Antiseptic Surgery.

Surgical Pathology—Billroth, Paget.

Midwifery—Lusk, Playfair, Leishman.

Diseases of Women—Thomas, Barnes.

Medical Jurisprudence—Tyler, Ordronaux, Beck.
